

WHERE TO PERFORM?

BY IZZAH RINGER

Purpose

To find out which places are better for an artist to perform based on the median household incomes of New Orleans.

Location

New Orleans

Analysis

For my analysis I first found the festivals and markets in New Orleans, then I enriched the layer to find the median income of those festivals, and finally I found the existing locations of festivals with a greater income than the original median income. This will give us the festivals with the highest median income which is what an artist would want.

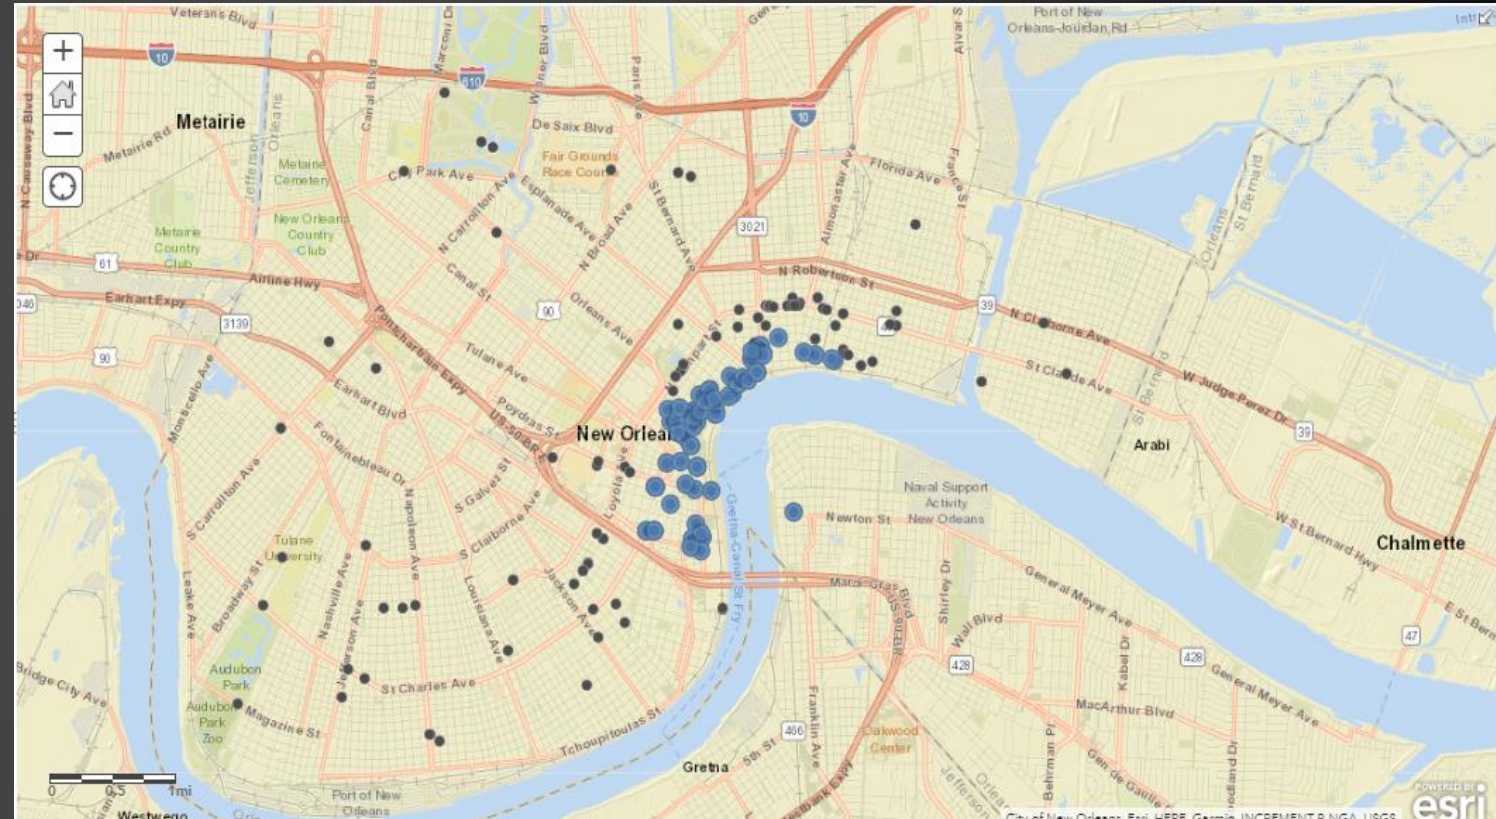

URL/Source

- I got my information from Data .Gov

<https://catalog.data.gov/datasets?tags=music>

Results

Here are the results.
The grey dots
represent festivals
with a lower median
income and the blue
show the ones with a
higher median
income.

My Career Path (So Far)

- Who I am
 - My name is Izzah Ringer I'm 14 going into high school as a 9th grader I like doing math mainly because I'm good at it. At home I like to make music and I'm good at listening to it too. My interest areas were ASR (Artistic, Social, and Realistic)
- Where I'm headed
 - I researched about a musical performers career, and they do what it sounds like, they perform music but you need to know a lot more then you might think in order to professionally perform. One way I can use GIS to perform music is exactly like I did here, I can find the best places to perform in any area.
- How I can get there
 - This summer I will improve on my rhyming and my vocabulary and try to improve on talking in front of a group of people
 - This school year I will stay out of trouble and try to learn as much about my aspiring career as I can.
- Who can help me
 - Friends, Family, professionals, and counselors are some examples of people who can help me reach my career.
